

Geoscientists Canada Position Statement on the Ukraine Crisis

Geoscientists Canada is the national organisation of geoscience practice regulators in Canada, facilitating discussion, co-operation, and understanding between the regulators. Our organisation is founded on professionalism, mutual respect, and a safe and supportive environment for the comanable exchange of ideas to ultimately achieve mutual understanding in the best interest of public and environment protection now and in the future.

We are heartbroken and appalled by the war raging in Ukraine and stand in solidarity with Ukrainians and all who may suffer as a result of this violence and incursion on the sovereign rights of a nation. We support the measures and sanctions implemented by the Canadian government in support of the people of Ukraine.

We will continue to work toward a future where our differences are seen as a strength and an opportunity for deeper understanding; a world where there is a free exchange of ideas, room for all, and peace. We are committed to supporting a safer world through the professional geoscience we practice.
